

PRESS ANNOUNCEMENT FOR IMMEDIATE RELEASE

Tuesday, 26.07.2011

HedgePole launches independent UCITS Alternative Indices; Global Macro - HedgePole UCITS Alternative Macro Index Managed Futures (CTA) - HedgePole UCITS Alternative CTA Index

Switzerland - HedgePole AG, an independent service provider for hedge funds price collection and middle office services, announces the launch of two UCITS indices which focus on individual hedge fund strategies. The first two indices cover the Global Macro and Managed Futures/CTAs strategies. UCITS, a regulated onshore (hedge) fund vehicle, has seen strong growth over the last couple of years, now collectively managing more than USD 100 billion in the alternative strategies.

HedgePole indices are unique as they aim to cover all UCITS funds matching the selection criteria to give a fair, reliable and independent representation of the performance of the relevant strategies. HedgePole ensures that the constituent funds fully meet the pre-defined selection criteria such as compliance with the UCITS directive as well as basic characteristics of a hedge fund. Further, HedgePole sources the NAVs pro-actively and directly from the constituent fund managers or their administrators ensuring that each calculation includes 100% of the underlings' latest updated NAVs.

The index constituents are equally weighted with minimum assets under management of EUR 10 million and matching the strategy of the relevant index. The official launch date was May 1, 2011. However, the historical performances have been tracked since May 2010 and are available together with the monthly performance updates on <http://www.hedgepole.com/UcitsValues.html>.

HedgePole invites industry members, fund managers, investors and other interested parties to visit <http://www.hedgepole.com/Register.html> to subscribe to the monthly index performance updates or to find out more about HedgePole's services.
